## Go Green When You Purchase or Refinance & Receive Up To \$17,500.00 Back!

### Here's How it works

When you purchase or refinance your home utilizing The Green Home Tax Credit Program<sup>SM</sup> you may be able to install complete home energy system and have all cost included in your home financing over and above your purchase price or existing loan balance. The system includes a whole home solar electric system, solar hot water heating system, and AeroSeal Certified Duct Diagnostics & Sealing<sup>®</sup>. Once you close the systems will be installed and you will begin saving on your utility bills right away. Not to mention you could receive a minimum of \$4,000.00 up to 17,500.00 back after closing *without* increasing your net monthly cost. Got your attention? Read on!

### Benefits

The environmental benefits of your green home will make you feel proud of going green. The financial benefits will make you feel pretty smart. Here's why: your net monthly cost may be lower (compared to a traditional purchase or refinance), you'll help protect yourself against energy inflation (*when utility rates go up so do your savings*), you'll instantly increase the value of your property, you'll improve your living environment, and best of all you could receive a minimum \$4,000.00 up to \$17,500.00 back after closing in cash rebates and tax credits.

### Funds are limited. Reserve yours today.

See your participating Green Home Program Agent or visit [www.GoingGreenSolar.Com](http://www.GoingGreenSolar.Com) to reserve your funds today. Don't forget to check the back cover for your promo code & qualify to receive **an additional 4,000.00 in savings!**
